

Problem-solving thinking

Projecting soft skills

Problem-solving thinking

Critical thinking is a cognitive process that involves the ability to address and solve problems efficiently and effectively. Problem-solving thinking is an iterative process, meaning it may involve going back and reviewing previous steps if new information is discovered or if a solution doesn't work as expected. Furthermore, the ability to adapt as the process progresses is essential for tackling problems.

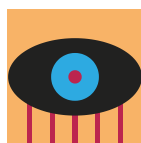

CRITICAL ANALYSIS

Problem-solving thinking involves the critical analysis of social challenges, identifying underlying causes and opportunities for change. This is essential for thoroughly understanding a problem before proposing solutions.

PROACTIVITY

Proactivity is related to taking initiative and assuming responsibility. In social innovation, this translates into the ability to lead projects, engage with the community, and mobilize resources.

ACTION

Action is at the heart of social innovation. Proactive thinking translates into the execution of concrete solutions and the implementation of positive changes in society.

KEY COMPETENCIES

Analytical
competence

To foster the ability to break down problems into their essential components, identify patterns and underlying causes

Synthesis
competence

It's about gathering all the information and perspectives from diverse positions to create comprehensive and innovative solutions.

Evaluation
competence

Develop the ability to evaluate proposed solutions, weighing their advantages, disadvantages, and long-term consequences

Problem-solving thinking is a cornerstone of effective decision-making and problem-solving in any context. Social innovation promotes a critical and reflective approach to addressing social challenges.

Training tools

01

Practice brainstorming activities

02

It addresses everyday problems with a "what if" mindset, periodically testing new approaches that address different scenarios.

03

Keep an idea journal where you write down all your ideas and tasks.

04

Practice your problem-solving skills with logic and strategy games

05

Stay up to date with current events in your field of work by consulting magazine or periodical publications on the topic to be discussed
